DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 11 and 14 recite the limitations "the existing cranking motor" and "the motor crankshaft". It is not clear what these limitations are intended to refer to since they have insufficient antecedent basis in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Holweg (DE 10006690 C1). As shown in Fig. 2, ring gear 34 is affixed to the crankshaft via clutch 27. Cranking motor 19 engages ring gear 34 via an intermediate gear train. See corresponding U.S. Patent No. 6,732,694 B2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Holweg (DE 10006690 C1). Holweg discloses the claimed invention as stated above except for selecting a gear ratio as specified. It would have been an obvious matter of routine optimization to one having ordinary skill in the art at the time the invention was made to construct the starter arrangement of Holweg with a gear ratio selected as claimed. Where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation. See *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Holweg (DE 10006690 C1) in view of Givan (US 4,573,364). Holweg discloses the claimed invention as stated above except for the planetary gear arrangement. Givan teaches that it is known to provide a starter with a planetary gear set. See Fig. 2. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the engine of Holweg with a starter having a planetary gear set, as taught by Givan, in order to improve starting torque.

Allowable Subject Matter

Claims 1-5 are allowed.

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brown (US 6,109,121) discloses an electric starter arrangement for motorcycles.
